

Seed Dispersal Chart

Wind

Some seeds are light and fluffy. Some seeds twirl. The wind blows these seeds to a new place.

Water

Some seeds float away on rivers, lakes or oceans to new places.

Hitchhiker

Some seeds have hooks that get stuck to socks, clothes, or animal fur. Later on, they fall off and land someplace new.

Animal

Some seeds are tasty for insects, animals, or people to eat. What animal would enjoy this seed?
