

This and 4 dice go inside a 2 1/4" x 3 1/2" manila envelope.

Dice Multiplication

1. Roll the first die. This die tells you the factor you are skip counting by.
2. Roll the second die. This die tells you how many times to skip count.

Example: Your first die reads 4. The second die reads 5. Skip count by 4s 5 times like this: "4, 8, 12, 16, 20."

Too easy? Use four dice! The first two dice tell you the factor you are skip counting by. The second two dice tell you how many times to skip count.
